The benefits and performance of SOLACOAT roof systems as a building **insulation technology** cannot be overstated. With specific insulation properties combined with **roof restoration qualities**, Solacoat is a logical choice for homes and businesses wanting to **reduce heat transfer**, **reduce energy bills** by reducing loads on air conditioners, fridges, freezers etc. and enjoy a comfortable environment within the home or workplace.

Significantly, Solacoat can reduce internal temperatures in passive and non passive buildings. It is noted that a reduction of 1% in heat can result in a 10 % saving on cooling costs (Macquarie University). Visit our website (www.enersense.com.au) for more information or call one of our friendly team for a no obligation discussion.

Ask to see a live demonstration of SOLACOAT in action!

- Assists in reducing energy bills by decreasing air-conditioning usage
- Improves indoor comfort
- Revitalises your roof extending its life
- Ten year limited guarantee
- Assists in inhibiting rust, corrosion and thermal shock. Excellent water proofing - anti-mould and anti fungi properties
